INFRARED THERMOMETER WITH LASER

Klein Tools IR1 is an easy-to-use, durable infrared (IR) thermometer. Simply point targeting laser on area to measure, pull the trigger, and read measurement on the display. The IR1 features 10:1 optical resolution, a backlit LCD, and a wide temperature measurement range of -4°F to 752°F (-20°C to 400°C). Built to withstand a 6.6 ft (2 m) drop test.

This meter is configured with a 10:1 optical resolution (distance-to-spot ratio). The distance-to-spot ratio defines the size of the measurement area relative to the distance between the measurement location and the IR sensor.
