Steel Construction Tools

Rebar Hickey

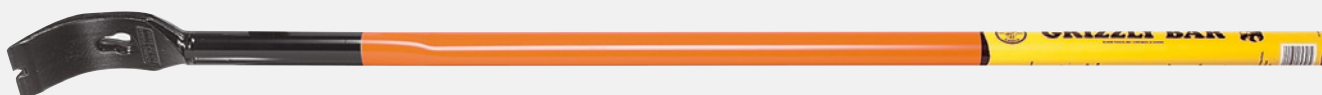

The lightweight rebar hickey has exceptionally durable steel-alloy head for your rebar bending needs. The extra-strong handles are built to withstand punishing service conditions.

Cat. No.	Hickey Size	Bends Rebar Size	Head Type and Bending Angle	Handle Length (cm)
64309	1a	#3 (.375" dia.) & #4 (.500" dia.)	double 65° & 90°	61
64310	2	#5 (.625" dia.)	single 65°	102
64311	3	#6 (.750" dia.)	single 65°	102
64312	4	#7 (.875" dia.), #8 (1.00" dia.) & #9 (1.128" dia.)	single 65°	152

Grizzly Bar

A heavy, strong, multi-purpose tool saves time and effort on the job. Use it to help align walls during tilt-up construction, roll and align large pipe, remove shingles and flooring, and many other stripping and prying tasks.

- The 3" (76 mm) width protects concrete when stripping forms.
- Efficient blade angle and total length provide high leverage as a crow bar and nail or spike puller even in awkward positions.
- Blade is forged and hardened alloy with keyhole nail-pulling slot in center and V-notch in tapered edge.

Cat. No.	Overall Length
64306	141 cm
