PINLESS MOISTURE METER

Easy to Detect Hidden Moisture

ET140

HARDWOOD

MASONRY

SOFTWOOD

DRYWALL

KLEIN TOOLS®
**PINLESS EMF TECHNOLOGY**
allows for non-evasive, non-destructive detection of moisture content in building materials and for water damage in the home.

- Detect and measure moisture content up to ¾" (19 mm) deep in materials
- Audible and visual alarms for moisture detection
- Select material type with mode button: drywall, masonry, hardwood, or softwood
- Auto-power off after 10 minutes of no usage to conserve battery life

Easy to detect moisture - measure any dry area, then compare test area to confirm moisture content.

---

**ET140 PINLESS MOISTURE METER**
Quick and easy detection of the moisture content in building materials and hidden moisture due to water damage. Select material type; drywall, masonry, hardwood, or softwood; and the pinless electromagnetic field (EMF) sensor detects moisture content without damage to the surface of the materials.
