
FOLDING INSULATION CUTTER

No more torn tool bags

FOLDING INSULATION CUTTER

Stay safe from rips or tears in your tool pouch with Klein Tools' Folding Insulation Cutter (31733). The serrated stainless steel blade cuts through foam and fiberglass with ease, and folds back into the comfort-grip handle for added protection. The lockback mechanism secures the blade open for heavy duty use and stable cutting. After the job is done, you can easily fold the blade back down, even with work gloves on.

Heavy duty construction is as sturdy as fixed blade insulation knives

LOCKBACK MECHANISM SECURES BLADE OPEN

Blade made from durable **3CR13 stainless steel** for heavy duty use

Comfortable, Non-slip grip handle

Serrated blade easily saws through foam and fiberglass insulation

Folded blade keeps cutter from piercing through tool pouches and bags

Lanyard hole for tethering

For Professionals
