

# Standard-Plus Full-Floating Body Belt Style 5249N

This full-floating body belt allows lateral movement of the D-rings during use. Padded for maximum comfort and body fit. Latigo-leather hood prevents placing tools between belt pad and D-ring web straps. The D-rings should be located about 1" (25 mm) in front of the hip bones. Never order Klein Lineman body belts by waist size. Always order the body belt by the desired distance between D-rings. A belt sized for the proper D-to-D size will fit correctly with buckle tongue engaged in the center hole.

## Specifications

Maximum Length:	40" (101.6 cm)	Minimum Length:	32" (812.8 mm)
