

## Linemans Backsaver Belt Size 24

As the title reads, this belt was designed to save a lineman's back. Leather construction is used throughout, including tool loops, tape thong, pocket tabs and cushioning material. Long-lasting 1-1/2" (38 mm) wide double-riveted leather tool loops keep your tools in place. The belt includes four suspender rings, tape thong, two-way knife snap, and glove-bag ring. Forged circle D-rings have corrosion-resistant finish and are proof-loaded to meet OSHA requirements.
