

## Multi-Tool Holder Module, Rail System

The Bucket Work Center is an ecosystem that will revamp the way a lineman works. It allows linemen to customize their workspace, just like other professionals customize their office space. The Klein Tools Multi-Tool Holder Module connects to the Bucket Work Center Rail System and holds hammers, grips and cable cutters. This will be "The Lineman's Office". The Bucket Work Center easily connects to aerial buckets with a standard 2-Inch or 3-Inch (5.1 or 7.6 cm) lip. Made of impact resistant materials with dielectric properties (up to 35kV) to withstand work conditions from -25 to 125-Degree Fahrenheit (-32 to 52-Degree Celsius). An assortment of modules are available to customize each workstation to fit the tools needed for the job.
