

Slim Chalk Reel, 30-Foot

Klein Tools Cat. No. CHLK30S 30-Foot Compact Chalk Reel features an advanced 3:1 gear ratio which significantly reduces downtime between marking tasks. The chalk level window allows users to monitor chalk levels without opening the tool, while the twist-lock top prevents chalk from spilling. The quick-release spool clutch button enables rapid line extension and the nested hook design keeps the hook flush against the reel body to prevent tangling during transport.
