

Spring Tool, 6-Inch Cushion-Grip

The Cushion-Grip™ Spring Tool is perfect for attaching or releasing trim springs. The unique C-shaped tip securely holds the spring, and the long 6-inch shaft makes attaching it to the fixture fast and easy. No more getting snapped from trying to hook springs with the wrong tool, or losing springs because they unexpectedly flew across the room after slipping off the wrong tool. Now you can install recessed cans faster and smarter than ever before.

Specifications

Overall Length: 9.75" (247.7 mm)

Shank Length: 6" (152.4 mm)
