

### BEFORE YOU START

1. Obtain the correct replacement fuse kit
  - a. MM100 Replacement Fuse Kit – Part #: 69193
  - b. MM200 Replacement Fuse Kit – Part #: 69194
2. Required Tools
  - a. Small Phillips screwdriver – No. 1 Phillips

### FUSE REPLACEMENT PROCEDURE (MM100 & MM200)

1. Ensure the meter is in the Off position and the unit is face up with the bottom of the unit facing away from you:
  - a. Beginning with the bottom of the unit, remove the bottom corners of the orange boot
  - b. Remove the lip of the orange boot from the groove on each side of the meter

(1a)

(1b)

- c. Continue removing the bottom of the orange boot from the meter. Remove carefully to prevent tearing as the boot may stick to the meter

(1c)

(1c)

## MM100 & MM200 Fuse Replacement

- d. With the boot completely off, remove the batter cover screw (1ea), disconnect and remove the battery, and remove the rear case cover screws (2ea)
- e. Carefully separate the front and rear cases starting with the bottom of the unit. Note: the top of the unit is secured with plastic tabs. Use care when sliding the top of the two cases apart

(1d)

(1e)

- f. Remove and replace the fuses

(1f)

- 2. Remove and replace the fuses
- 3. Reassemble the unit in reverse order
